## Special: Bioprocessing Get on Board!

➤ **Publication date: 14 March, 2019**

---

### Hot topics in bioprocessing

---

As new drug formats such as cell & gene therapies, bispecific antibodies, or even conjugates are filling clinical pipelines, new and cost-effective processes are needed to make them a business case. Contract manufacturers that have all the capacities in-house to develop a biologic/advanced therapy GMP compliantly from preclinical stage to the filled & finished product have good chances in the emerging new markets. As yields have been reported up to 16g/l for bispecific antibodies, formulation technologies that inhibit protein aggregation are crucial to assure drug safety and efficacy as well as DSP equipment to manage to USP yield.

---

### Present your expertise

---

Drug developers, CDMOs and experts will have the opportunity to present their latest products, processes, and equipment in this special, **which will find extra circulation on the spot at BIO-Europe Spring 2019 in Vienna via our BIOCOM-Booth, Media Tables and the exclusive handout at the plenary session on Day 1.** EUROPEAN BIOTECHNOLOGY MAGAZINE goes out to decision makers throughout the entire European Life Sciences sector. Take advantage of to the journal's highly relevant readership and grab this opportunity to target your audience!

---

### Topics to be covered

---

**Services & equipment:** cell line selection, process development & upscaling, process monitoring, QbD, single use equipment, media development, cell culture, glycoengineering, conjugation, formulation, fill & finish, DSP, continuous processing, ex vivo genetic engineering, TCR engineering, IgG-like bispecifics, AAV and lentiviral vector technology, plasmid engineering, modular UPS and DSP, antibody engineering, purification, polishing

**Editorial Deadline**  
25-2-2019
