BIO-EUROPE SPRING®

28 – 30 March 2022
Basel
Switzerland

BIO-Europe Spring

BIO-EUROPE SPRING Reconnecting and facilitating global partnerships in the life sciences, the business partnering conference BIO-Europe Spring 2022 will take place as a hybrid event from 28 to 30 March 2022 in Basel, Switzerland and from 4 to 6 April 2022 in a digital format.

It's time once again to network and facilitate partnerships face-to-face at the premier springtime event for the life science industry. BIO-Europe Spring® 2022 will be held March 28–30 in Basel, Switzerland.

Over the last year, we launched this new way of partnering in the digital world and discovered its effectiveness in bringing the international life science community together to partner from anywhere in the world. That's why our refreshed event approach will offer you two ways to attend. First, our All-Access Pass will allow you to attend the event on March 28–30 and participate in virtual one-to-one meet-

ings on April 4–6, in addition to all on-demand content before and after the event. Second, our Digital Access Pass will allow you to participate in virtual one-to-one meetings and digital live networking sessions, April 4–6, and access on-demand content before and after the event. By marrying the best of the past with the new present, attendees can choose to partner onsite or digitally from home – gaining an equally valuable experience.

This event is expected to bring together over 2,500 leading executives from biotechnology, pharmaceutical and finance companies from around the world who will engage in 15,000+ partnering meetings.

With ONE login, partneringONE®, will allow delegates to experience the entire event from anywhere, including one-to-one meetings and conference activities.

Whether you toast to building partnerships face-to-face or screen-to-screen come next spring, join your peers in life science for a global dealmaking event like no other. ■

Come to Basel

BIO-Europe® Spring is a key strategy for global biotech, pharma and investors who attend in search of new collaboration partners and deal opportunities and we are thrilled to be back face-to-face for its sixteenth annual edition.

We are excited to be returning to face-to-face events in 2022 with our new 'smart' event format that embraces advantages of the digital delivery and melts them together with live people interaction at the event. This will make the event more efficient than ever before. Come join us!

BIO-Europe® Spring will bring together a wide variety of companies to present their licensing opportunities directly to potential partners, resulting in alliances that literally change the world. Partnering will also feature instant scheduling of all meetings mutually agreed to, so delegates can plan for their meetings much earlier in the process. Program content, led by respected industry experts, includes business development, therapeutic areas, digital health, and start-up innovations available live and on-demand.

We hope to see you in Basel and online!

BIOCOM®

6th AMR Conference
 Novel Antimicrobials & AMR Diagnostics

7-8 April 2022
Congress Centre Basel
Switzerland

Meet live again

AMR CONFERENCE 2022 During the 6th AMR Conference industry, SMEs, investors, clinicians, policymakers and regulators will finally meet live again to discuss the current state of the fight against antimicrobial resistance (AMR). The agenda will cover R&D strategies, pull incentives and a start-up competition.

Being an established platform to connect relevant AMR stakeholders from industry, SMEs, finance, hospitals, science, and policy, the sixth AMR Conference will provide two days packed with 20 sessions on the most urgent topics the AMR community is currently dis-

cussing: How did policymakers in Europe and the US take over their role in establishing most needed pull incentives? Which new initiatives have been started to further push forward innovations in antimicrobial therapies and diagnostics? What updates can be provided by existing investors, funds and accelerators? Which approaches investigators are developing to improve the efficiency of preclinical models as well as clinical trial designs?

Perspective of SMEs

The 2022 conference edition, hosted by BIOCOM in cooperation with the European SME organisation BEAM Alliance, will be the first face-to-face meeting of the AMR community in Europe for more than two years. Together with other major stakeholders such as CARB-X, the IMI AMR accelerator, the AMR Action

Fund, the Novo Repair Impact Fund and others, the stakeholders will explore further strategies to improve conditions for companies developing novel antimicrobials or AMR diagnostics. A special focus of the event is targeted to the perspective of innovative SMEs, their R&D pipeline, requirements for regulation and policy frameworks.

Improving clinical R&D

In addition, the conference will be a platform to discuss innovative strategies to improve preclinical R&D as well as clinical trial designs. Among the partners of the event will be the EU-funded IMI AMR accelerator which is organising its annual meeting as a pre-conference event on 6 April. During the conference, the accelerator will provide, among others, particular insights on UNITE4TB, a 7-year, €185m new project aimed at changing the paradigm of clinical TB drug development. In addition, the conference will highlight innovative strategies such as phage therapies, vaccines and monoclonal antibodies, AI-driven models and novel diagnostics. Among the further highlights will be a start-up competition, hosted by the pharma-backed incubator INCATE. Founders are requested to apply until January 31, 2022. The Top Ten will qualify for a pitch during the conference.

QUICK FACTS

- › **Programme** – 80+ high-level speakers in 20 sessions; pre-conference day & workshops
- › **Partnering** – 1-to-1 partnering among the 400+ participants
- › **Innovation** – Start-up competition, poster session and exhibition

SWISS 
BIOTECH™

2 - 3 May, 2022
Congress Centre Basel,
Switzerland

Big bizz in Swiss

SWISS BIOTECH DAY One of the leading biotechnology conferences in Europe is a fixed date in the community's calendar. In 2021, more than 850 life sciences colleagues celebrated a reunion at the first face-to-face event since the beginning of the COVID-19 pandemic.

Panel discussions on the continued counter of the COVID-19 pandemic, post-COVID-19 supply chains and drug manufacturing, and the latest trends in the biotech sector attracted biotech executives, international delegations and investors alike.

More than 40 exhibitors, 50 company presentations, and 800 partner discussions contributed to the lively atmosphere of this networking event.

Building on this great success – a third of the audience is international – the Swiss Biotech Day is further developing to a truly global networking day and will be extended to 1.5 days in 2022. This prolongation gives room for more information, more discussion, more pitches, more networking, and more time to find interesting partners for future projects.

The conference covers world-renowned research in life and data sci-

ences and successful translation of innovations and new developments on the whole added-value chain to efficient manufacturing and production. It attracts biotech entrepreneurs, international investors, researchers, analysts, political decision-makers, and industry stakeholders alike.

The event's organizers will set up an inspiring programme with thematically focused panel discussions, allowing more time to interact with speakers and for networking.

An emphasis will lie on opportunities and synergies offered by the close collaboration of pharmaceutical and biotechnology companies that has shown impressive results in the COVID-19 pandemic. The trends in research and development, production, data management, artificial intelligence, and innovative financing – there will be a lot to discover in Basel in May 2022. ■

Come to Basel

GREETING With over 850 visitors, the Swiss Biotech Day 2021 celebrated a successful comeback as a live event and documented the impressive growth of the Swiss biotech industry in the midst of the COVID-19 pandemic.

R&D investment grew by 10% in 2020 to CHF2.2bn, and

Swiss biotechs attracted record investments of 3.4bn – three times more than in 2019 – and created 8% more jobs.

Reason enough to once again seek the dialogue with the 1,000+ Swiss biotech companies and their international partners at the Swiss Biotech Day.

We look forward to welcoming you on 2-3 May 2022 in Basel.

2 & 3 May 2022
Congress Center Basel

The Swiss biotech industry is not slowed down by the Covid pandemic - this was shown at the live Swiss Biotech Day 2021 after it had to be postponed in 2020. Together with our business associates and investors this networking conference has become a great place for innovation, research and the advancement of biotechnology. As one of the leading biotechnology conferences in Europe, the Swiss Biotech Day 2022 is further developing to a truly global networking day and extending to 1.5 days.

We hope to see you in Basel on **2 & 3 May 2022** in person again.

What you can expect:

- › Meet 850+ senior experts from the life science industry
- › 50+ exhibitors from across Europe
- › Delegations from various regions
- › General Assembly of the Swiss Biotech Association
- › Swiss Biotech Success Stories Awards
- › Innovative biotech start-ups and medium-sized biotech companies
- › Thematically focused panel discussions
- › Pre-scheduled one-to-one partnering meetings

hybrid event – on-site and online

Hunting results

RENEWABLE MATERIALS The unique concept of the Renewable Material Conference 2021 hit the mark: bio-based, CO₂-based and recycled are the only alternatives to fossil-based chemicals and materials. In 2022, the conference will be held as a hybrid event in Cologne.

For the second time, nova-Institute presents numerous market highlights from bio- and CO₂-based chemicals and materials as well as from chemical recycling: All material solutions based on renewable carbon. Together, there is sufficient potential to completely replace petrochemicals by 2050. To tackle climate change at its roots, all additional fossil carbon from the ground must be substituted with renewable alternatives.

Over the course of three days, participants will get a comprehensive over-

view of the latest developments in the renewable material sector, with a focus on industry-ready solutions from a wide spectrum of sustainable raw materials and technologies.

The program includes a diverse range of bio-based materials such as bio-based polymers, plastics and biocomposites (first and second generation, biowaste), CO₂-based materials (from fossil and biogenic point sources, atmosphere) as well as mechanically and chemically recycled materials.

The innovation award “Renewable Material of the Year” will showcase the vast spectrum of renewable materials. The most outstanding winning products will be chosen by the conference participants and honoured at a festive awards ceremony.

On-site, the conference will be accompanied by a large exhibition where companies and institutes can showcase their recent developments. The supporting program, networking activities and many secluded spots at the location offer excellent opportunities to make contacts.

End of fossil carbon

GREETINGS Ready-to-use fossil-free sustainable material solutions with a low carbon footprint are in fast-growing demand. Innovative brand owners are keeping an eye out

for such solutions, in particular those that will soon reach the mainstream.

In 2021, the new concept of the Renewable Materials Conference generated an outstanding response, which exceeded all expectations: 420 online participants witnessed a firework of innovations of non-fossil material. 60 speakers, 11 panel discussions, 500 public posts and 1,500 networking activities were proof of the lively exchange during the three conference days. In 2022, nova-Institute expects 400 participants on-site in Cologne and many more online.

Be part of the sustainable future of chemicals and materials: The Renewable Materials Conference will create new prospects and synergies by bringing together many cross-sectoral networking opportunities. Here, innovation and implementation connect.

We are looking forward to welcoming you in Cologne.

Michael Carus
Managing Director, nova-Institute
