SPECIAL

PHARMAPACK
By CPHI

18th Jan - 17th Feb '23 -online
In person 1st - 2nd Feb '23 at Paris
Expo, Porte de Versailles, France

Pharmapack 2023

PACKAGING Pharmapack is Europe's largest event dedicated to the pharmaceutical packaging and drug delivery industries. With an extensive conference agenda, it provides invaluable opportunities for networking and showcasing innovations.

Pharmapack 2023, taking place in hybrid format with in-person event on Feb 1st -2nd 2023, at the Paris Expo, Porte de Versailles Paris, France, is bringing together nearly 5500 pharma executives from 75 different countries and more than 350 exhibitors at the heart of the pharma packaging and drug delivery industry. The online platform (18th Jan -17th Feb, 2022) will be available to all registered participants.

Beyond the exhibition floor, 15 sessions under Three Tracks- Device & Packaging Innovation, Large Volume

Drug Delivery & Combination Product and Sustainability- delivered by industry experts will take place over the 2-day event to discuss the very latest market trends in the drug delivery space. Running alongside will be workshops: Sustainable Materials, Autoinjectors, Labelling & Track & Trace or Contract Packaging and the returning 'innovation gallery' which will showcase exhibitor innovations providing a window on the latest trends and cutting-edge developments. The 'learning labs' will provide an opportunity to

hear from different exhibitors on their research and products.

The show floor will also feature Start-up hub, a platform for young start-up companies to exhibit their innovations, providing valuable brand visibility. All these sessions will be streamed for online audiences. In-person attendees can also participate in guided expert-led walk-throughs on the 'innovation tours'.

The much-awaited Pharmapack Awards will return this year celebrating the best products and innovations from the pharma packaging world under two categories of 'exhibitor innovation' and 'health products'- with an awards ceremony on Feb 1st 2023. ■

QUICK FACTS

Pharmapack Europe will be online 18th Jan - 17th Feb, and in person 1st - 2nd Feb, 2023 at the Paris Expo, Porte de Versailles, France.

In 2022, some 5000 attendees from 250 companies and 75 countries went to on the Paris Expo for what was one of the most convivial exhibitions in memory.

- The latest content agenda for the 2023 event is available here – <https://informamarkets.turtl.co/story/pharmapack-2023-content-agenda/page/1>.
- For more information and online registration, please visit <https://www.pharmapackeurope.com>

Come to Paris 2023

GREETING *The great thing about Pharmapack is that it remains the absolute heart of the drug packaging and delivery industry, and the event retains a community- and innovation-driven atmosphere. The 2023*

edition will also feature a larger sustainability agenda and the full return to onsite content – so already there is a real excitement amongst the industry to return and a desire to accelerate their partnering.

7th AMR Conference

Novel Antimicrobials & AMR Diagnostics

16-17 March 2023
Congress Centre Basel
Switzerland

The silent pandemic

AMR CONFERENCE 2023 The AMR Conference is the well established international platform for SMEs, start-ups, big pharma, academia, investors and public institutions to discuss the latest updates in innovation and related policymaking needed to bring new antimicrobial treatments and diagnostics to the market.

Being the proven successful forum to connect relevant AMR stakeholders from industry, SMEs, finance, hospitals, science, and policy, the seventh AMR Conference will provide two days packed with 20 sessions on the most urgent topics the AMR community is

currently discussing: How do policymakers take over their role in establishing most needed pull incentives? Which new initiatives have been started to push forward innovations in antimicrobial therapies and diagnostics? Which approaches take investigators to improve the efficiency of preclinical models as well as clinical trial designs?

QUICK FACTS

- **Programme** – 80+ high-level speakers in 20 sessions; pre-conference day & workshops
- **Partnering** – 1-to-1 partnering among the 400+ participants
- **Innovation** – Start-up competition, poster session and exhibition

Further information:
www.amr-conference.com

Perspective of SMEs

The goal of the conference is to catch up with the latest trends in the development of AMR products. The upcoming conference will provide an important platform for all stakeholders – in particular for small and medium enterprises and start-up companies – to exchange views on innovation opportunities, development paths and alternative business models. The 2023 conference edition, hosted by the Euro-

pean SME organisation BEAM Alliance in cooperation with bamconn GmbH, will again be the leading meeting of the AMR community in Europe. Together with other major stakeholders such as the Novo Repair Impact Fund and others, the participants will explore further strategies to improve conditions for companies developing novel antimicrobials or AMR diagnostics. A special focus of the event is targeted at the perspective of innovative SMEs, their R&D pipeline, requirements for regulation and policy frameworks.

A 360°-view on AMR innovation

In addition, the conference will be a platform to discuss innovative strategies to improve preclinical R&D as well as clinical trial designs. Among the partners of the event will be the EU-funded IMI AMR accelerator which is organizing its annual meeting as a pre-conference event on 15 March. Beyond the overview of antifungal and antibacterial innovation landscape, the conference will also propose a special focus on how India is tackling the AMR issue. Among the further highlights will be a start-up competition, hosted by the pharma-backed incubator INCATE. Founders are requested to apply until January 15, 2023. The top ten candidates will qualify for a pitch during the conference.

BIO-EUROPE SPRING®

20–22 March 2023
Basel
Switzerland

BIO-Europe® 2023

BIO-EUROPE SPRING It's time once again to network and facilitate partnerships face-to-face at the premier springtime event for the life science industry.

The seventeenth annual BIO-Europe Spring premier springtime partnering conference is back in-person and will be taking place March 20–22, 2023 in Basel, Switzerland.

After being delivered digitally over the last two years, the event is expected to bring together over 2,800 leading executives from around the world to engage in more than 15,000 one-to-one meetings. The event will cater to the needs of the entire value chain with world-class workshops and panels, innovative company presentations, active exhibition, and a variety of networking opportunities making this event an unrivalled forum for companies across the biotech value chain to meet and do business.

EBD Group is committed to providing a top-tier forum for the global

biopharma community to come together. With that goal in mind, this year's event will feature three days of digital partnering in the week following the in-person event.

partneringONE® will continue to allow delegates to experience the entire event from anywhere, including one-to-one meetings, on-demand content, and conference activities. Scheduled meetings will take place face-to-face during the conference days as well as digitally during the digital partnering days with links to a video conferencing solution.

We are thrilled to welcome you back to this "must-attend" springtime partnering event—making it a special reunion for some and new beginnings for others.

Come to Basel

GREETING We are all thrilled to reunite at the next BIO-Europe Spring, to meet in-person and of course to make new connections. Expanding on the success of EBD Group's flagship conference, BIO-Europe® this last October, we anticipate this conference to exceed 2019 as well.

The last couple of years have fundamentally changed business development and networking. While we are happy to have established new digital meeting solutions and virtual conferencing, the EBD team is thrilled to launch BIO-Europe Spring as a fusion of innovative digital solutions and a vibrant onsite event of unprecedented scope. We are looking forward to welcoming both attendees in Basel and online next spring."

SWISS+ BIOTECH™

April 24-25, 2023
Congress Centre Basel,
Switzerland

Swiss Biotech Day

SWISS BIOTECH DAY One of the most important biotech conferences in Europe, the Swiss Biotech Day, will once again attract over 1,000 senior life science experts from all over the world to Basel.

The Swiss Biotech Day in Basel is a fixed date in the biotechnology community's calendar. In 2022, the conference demonstrated the impressive growth of the Swiss biotech industry and presented an exciting program with ideal networking opportunities across borders to over 1,200 participants from 36 nations.

Switzerland's most important biotechnology conference is equally attractive to biotech companies, their suppliers, investors and pharma corporations. In 2023, the Swiss Biotech Day will again offer high-level experts from the life science industry the space to network, discuss and discover trends

in R&D, manufacturing, data management, artificial intelligence and innovative financing over one and a half days. Partnering allows to take advantage of opportunities and synergies arising from the close cooperation between biotech and pharma or to find interesting partners for future projects, and to jointly drive the development of innovative products and platform technologies. In addition, international biotech delegations use the "Global Village" to strengthen their ties with Switzerland as a biotech location and promote cross-border investments, public-private partnerships, research and development collaborations and exchange of talent.

An inspiring program with thematically focused panel discussions, exhibition, company presentations and partnering are the cornerstones of the lively networking event, accompanied by the trends and facts of the Swiss biotech industry and the celebration of the Swiss Biotech Success Stories Awards.

BIOCOM®

14 & 15 June 2023
 Palexpo, Geneva, Switzerland
www.connectinpharma.com

Connect in Pharma

FUTURE PHARMA After a successful launch in 2022, Connect in Pharma returns to Geneva to bring together the community of professionals shaping the future of drug delivery, manufacturing, outsourcing and packaging.

Connect in Pharma aims to drive innovation, business and new partnerships in four key areas: innovative packaging, drug delivery systems, sub-contracting, and manufacturing. Taking place in Geneva – the centre of a major pharmaceutical and biopharma cluster – Connect in Pharma is the perfect place to meet key influencers from leading pharmaceutical groups, biopharma, industry clusters and suppliers.

After attending the 2022 event, Elena Obrecht, Head of Maintenance at

Johnson & Johnson said: “I have been inspired by the newest trends in the market, including pharma and medical device innovations.”

With expert speakers, workshops, a gala dinner, receptions and lounges, Connect in Pharma offers unrivalled opportunities to network, negotiate and foster connections with inspiring thought-leaders, world-wide key industry professionals and the most exciting innovators. Exhibitors and visitors can expect to connect with

a curated collection of industry leading brands seeking to source packaging and production solutions in the pharmaceutical industry.

In 2023, visitors will find even more content to support the industry’s navigation around the future of pharma, with three stages tackling and advising on the trends and trials facing the pharma and biopharma community.

The theme of the event is creating and navigating the future of pharma.

The conference programme will address key factors that will revolutionise the industry: sustainability, connected health, AI and digitalisation, and human-centric approaches. Also, at the event, there will be speakers from Google, NASA, Forbes, GSK and Bayer who will speak about their experiences and how the current use of technology will advance the pharma community. ■

Come to Geneva

GREETING Europe is home to a range of companies making extraordinary advances across drug delivery, manufacturing and packaging, and we’re delighted to be able to bring that community together through Connect in Pharma.

Everyone who attends Connect in Pharma can expect

to find something that inspires them, a new business lead or a solution to a technical challenge, and a host of new ideas to take back.

Last year’s first-ever Connect in Pharma event was a huge success. We can’t wait to welcome our exhibitors, partners and visitors to an even more dynamic event in June 2023. We hope to see you in Geneva!
